

# GRIZZLY

SUPPLIES

SEAL IT, MOVE IT

## Catalogues are great... Except when the part number doesn't exist...

We have catalogues to support you, however, we don't stop there! "Out of stock" is something you will rarely hear from our staff. Outside the box thinking enables us to come up with solutions that are unsurpassed in the industry. If we can not find a direct replacement for the item you are looking for, we can custom machine your seals with our in house machining capabilities.

There is no challenge too big for our team – troubleshooting is our specialty. Whether it's environmental factors, wear and tear, or in some instances poor cylinder design: the seal experts at **Grizzly Supplies** have the experience and the technology to help.

Moving You Forward Since **1998**

At **Grizzly**, customer service is our greatest priority.  
Call us **TODAY** to learn more.
